## Proof of Reserve & Public Technical Verification Record

Ethereum Mainnet | Latest On-Chain Reserve Version 7 | Document Version 5.7

Document status: FINAL PUBLIC TECHNICAL EVIDENCE RECORD. This revision separates the latest supplied on-chain state (reserve version 7) from the historical version-4 Bank API / Chainlink / Safe evidence retained for traceability. Confidential credentials and unrelated investor secrets are excluded.

### 1. Document Control and Legal Entity Evidence

| Field                                               | Value                                                                                                                                  |

| Wyoming certificate statement date                  | 25 August 2026                                                                                                                         |

Corporate evidence basis: The Pakistan Coded House business record predates the Wyoming LLC. FBR records list Coded House as a business/branch under taxpayer MUNNAZA USMAN, with a business acquisition record dated 1 July 2024 and taxpayer registration dated 9 July 2024. Coded House LLC is the later U.S. legal entity. The formation-service portal shows 24 August 2026 as the formation date; the Wyoming Secretary of State certificate states that the entity complied with applicable office requirements on 25 August 2026; and Certificate ID 106838024 was issued on 27 August 2026 at 5:45 AM. The records do not themselves establish a parent/subsidiary or legal-succession relationship.

Date-source note: Pakistan FBR records place the Coded House business presence in July 2024. The Wyoming formation-service portal shows Formation Date 24 August 2026. The Wyoming Secretary of State certificate separately states compliance on 25 August 2026 and was issued on 27 August 2026 at 5:45 AM. These dates describe different source events and are not merged.

## 2. Scope and Claim Boundaries

- This document is a technical Proof-of-Reserve evidence record covering an authenticated Bank API workflow, Hyperledger Fabric, PKCS#11/EIP-712 signature evidence, Chainlink, Safe multisig governance, and Ethereum Mainnet.
- It is not represented as a SWIFT MT message, bank statement, blocked-funds confirmation, interbank transfer notice, or external custodian statement.
- It does not claim direct access to a bank's internal core-banking platform.
- It does not claim an independent auditor opinion. Technical attestationHash and auditHash values are cryptographic evidence fields, not substitutes for a signed third-party audit report.
- API keys, access tokens, private keys, PKCS#11 signing-module PINs, raw approval codes, raw investor signatures and calldata are intentionally excluded.

## 3. Current On-Chain Reserve State

| CodeXToken totalMinted            | Not separately supplied in the current live-state update                                                   |
| CodeXToken fundMintPermission     | Not separately supplied in the current live-state update                                                   |
| CodeXToken fundReserveVersion     | Not separately supplied in the current live-state update                                                   |

Current-state source note: The latest values supplied for this revision are ReserveOracle reserveVersion 7, CodeXToken totalSupply 456,500,000 CDX, availableReserve 456,500,000 EUR, collateralRatioBps 20000 (200%), lastSnapshotAt 18 August 2026 18:26 UTC, and reserveStatus=false. ReserveManager fundReserveVersion, CodeXToken fundReserveVersion, totalMinted and fundMintPermission were not separately supplied in this update, so this document does not invent a 7/7/7 alignment. Historical version-4 evidence remains in Sections 4-9.

- Reserve request ID: 0x5e74952ef4fdce44dc61d9022df1595aeaa8bd0a170a82109f2250dbc44e3642

**Etherscan use:** This document is supporting public technical evidence only. Etherscan smart-contract source verification is a separate process that publishes source code matching deployed bytecode. Inclusion of this document does not imply Etherscan approval or endorsement.

## 14. Corporate Evidence Attachment

| Evidence          | Value                                                                                                |
|-------------------|------------------------------------------------------------------------------------------------------|
| Attachment        | CertOfGoodStanding.pdf                                                                               |
| Issuing Authority | State of Wyoming - Office of the Secretary of State                                                  |
| Legal Entity      | Coded House LLC                                                                                      |
| Entity ID         | 2026-002065283                                                                                       |
| Status            | In existence and in good standing                                                                    |
| Duration          | Perpetual                                                                                            |
| Certificate ID    | 106838024                                                                                            |
| Issued            | 27 August 2026 at 5:45 AM                                                                            |
| Validation        | Certificate may be validated through the Wyoming Secretary of State certificate-confirmation process |

**Attachment purpose:** The Certificate of Good Standing is included as corporate-status evidence. It does not provide or replace the technical reserve evidence described in the other sections.

## 15. Integrity and Release Statement

- The accompanying SHA256\_MANIFEST.json contains the SHA-256 digest of each released file in this package, including the Certificate of Good Standing.
- IPFS CIDs are not invented in this record. A CID should be recorded only after the exact final file is uploaded to the intended IPFS service.
- Any later edit to the DOCX, PDF or JSON requires recalculation of the corresponding SHA-256 digest and any content-addressed CID.

## 16. Authorized Signatory of Record

| Field                  | Value                                                        |
